WHAT IS A FOREVER TAG?

FOREVER TAGS replace old-fashioned hand-written and labeled tags when used with the camera app on mobile devices.

Property owners can upload their digital contact information and associate it with pre-printed tags so that people who find their lost articles can return them.

Adhesive Tag
1" X 1"

Available
in 2
Styles

Engraved Metal Tag
1.5" X 1"

HOW IT WORKS?

Yes. That Easy!

1 Open camera app

2 Aim at QR code

3 Click on pop-up link

We help people identify and authenticate property with modern technology!

FOREVER TAG digital tags are pre-coded with a link to the iTag.com website. Purchasers receive in-pack credentials to edit the website so their personal information appears when a **FOREVER TAG** is read by a compatible mobile device.

FOREVER TAG is not a tracking system. It won't help locate a lost item. It will help someone who finds a lost item to return it to the property owner.

SPONSOR FEATURE

As an option, retailers or organizations who want to place their logo and/or two lines of information in the top portion of the user's screen can sign-up as a Sponsor on the iTag.com website.

Using credentials found inside the Inner Pack, a Sponsor can electronically place their information in all of the tags in the Inner Pack with one easy upload.
